Linde Hydraulics on track to build new main plant

- Parking deck opened with over 770 spots on six levels
- Beginning of new manufacturing and assembly building
- Plant to start operations in first quarter of 2016

Aschaffenburg, 17 September 2014 - Linde Hydraulics GmbH & Co. KG has completed the first phase of building a their new ultra-modern main plant with the completion of the parking garage: The new staff parking deck in Aschaffenburg provides more than 770 parking spaces on a total of 6 levels. The construction expands to existing parking capacity by 250 additional spots and will be used by employees of Linde Hydraulics and employees of Linde Material Handling GmbH.

The construction of the main plant is a key part of the new stand-alone strategy of Linde Hydraulics. With modern machinery and processes, and in particular greatly expanded research and development capabilities, the company's pursuit of global innovation and successful growth.

In just a few weeks, the second phase of the project will already begin: In the area of the former parking lot, the construction of the ultra-modern new facility with 24,000 square meters of production and assembly space will get started. The required construction permission was granted in September, enabling Linde Hydraulics to begin earthmoving as early as November. In December the company expects to start the initial building construction phase. Completion is expected in the first quarter of 2016.

"With the completion of the first phase of the project, we make a big step towards our goal of building an ultra-modern brand new factory", said Dr. Jörg Ulrich, CEO of Linde Hydraulics. "We are really excited about starting construction on the heart of our new plant: The production and assembly hall will help Linde Hydraulics through its performance-optimized systems and processes to gain important growth momentum".

– About Linde Hydraulics –

Linde Hydraulics is a global developer and supplier of modular drive systems consisting of hydraulics, electric drives and electronics. As technology leader in high pressure hydraulics, Linde Hydraulics is the development partner and supplier of a number of reputable manufacturers of mobile work machinery, including earth moving and road building, agricultural, forestry and material handling, as well as manufacturers of industrial machinery.

The company, which was founded in 1904, is based in Aschaffenburg, Germany and has subsidiaries in Europe, the United States of America and China as well as a global network of roughly 60 sales and service partners. Since 2012 Weichai Power is with a stake of 70 percent the general owner. The Linde Material Handling GmbH, a subsidiary of KION GROUP AG, holds a 30 percent stake in Linde Hydraulics.
