

## **Information according to Art. 33 (1) REACh-Regulation**

Aschaffenburg, 26.06.2024

Dear Sales Partner,

the European Union regulation (EG) 1907/2006 (REACh-Regulation) contains rules on the registration, evaluation, authorization, and restriction of chemical substances. It defines different duties to provide information along the supply chain or to the European Chemicals Agency (ECHA).

As soon as an article contains a substance of very high concern (SVHC), that is listed on the candidate list (Annex VIX), above a threshold of more than 0,1% weight by weight (w/w) suppliers are obliged to communicate information along their supply chain according to article 33 (1) of the REACh-Regulation. The use of the products is not prohibited, and they pose no harm if handled as intended. However, notification along the supply chain is required. The candidate list is updated regularly by ECHA. It can be found on: <https://echa.europa.eu/candidate-list-table>

We hereby want to inform you according to art. 33(1) REACh-Regulation that some products of Linde Hydraulics GmbH & Co. KG (LHY) contain articles with a SVHC candidate substance >0,1% w/w. Detailed information can be found in the attached table. It relates to the candidate list as dated: January 2024

Furthermore, ECHA is collecting information on all articles containing a SVHC candidate substance >0,1% w/w in the SCIP database (Substances of Concern In Products), that was installed in 2021 by the Waste Framework Directive (2008/98/EC).

Link to the database: <https://echa.europa.eu/de/scip-database>

Purpose of the SCIP database is to provide the information about the registered products throughout the whole lifecycle and make it available to waste disposal companies and

consumers. Affected products are entered into the SCIP database by LHY with the information required by §16f ChemG.

The SCIP number can be provided upon request.

We will inform you as soon as there are any relevant changes to the candidate list that affect our products.

With kind regards,

Linde Hydraulics GmbH & Co.KG
